

Cloud computing is a type of computing that delivers computing, storage, and even applications as a service across a network. According to **Microsoft** there are 3 different deployment types of cloud computing

- I. Public cloud
- II. Private cloud
- III. Hybrid cloud

And 4 type of cloud services:

- I. Infrastructure as a service (IaaS)
- II. Platform as a service (PaaS)
- III. Serverless computing
- IV. Software as a service (SaaS)

- 1. Pick one of these deployment types and talk about it in one paragraph
- 2. Pick one of these cloud services and talk about it in one paragraph
- 3. list the top 3 benefits of could computing
- 4. list the top 5 uses of cloud computing
