"Mobile Operating Systems"

A mobile operating system (or mobile OS) is an operating system for phones, tablets,

smartwatches, or other mobile devices[1]. IOS and Android handle process management

differently.

1- compare between the between the systems in terms of:

    I.   System calls

    II.   Inter-process communication

    III.   Memory management

    IV.   File management

    V.   Security

2- As a conclusion, which system you think is better? Why?
